SEEDECO® Stone Carpets

Endless Possibilities

Our SEEDECO® Glass Products offer unlimited design potential. They are used in various manufacturing processes and different industrial branches by the architects, landscape architects, landscape gardeners, community and city planners and contractors. Glass is an amorphous material - solidified from a red-hot molten melt. Because of its unique properties, such as durability, acid resistance, and thermal insulation, glass is an ideal material for manufacturers of the most diverse products.

Advantages :

- Intensive color; colourfast
- Rot-proof and collects no moss
- Self-cleaning
- Good heat insulation properties
- Completely recyclable
- Excellent acid- and base-resistance
- High chemical stability
- Cost effective maintenance
- Average product life = minimum 50 years

Our Vision :

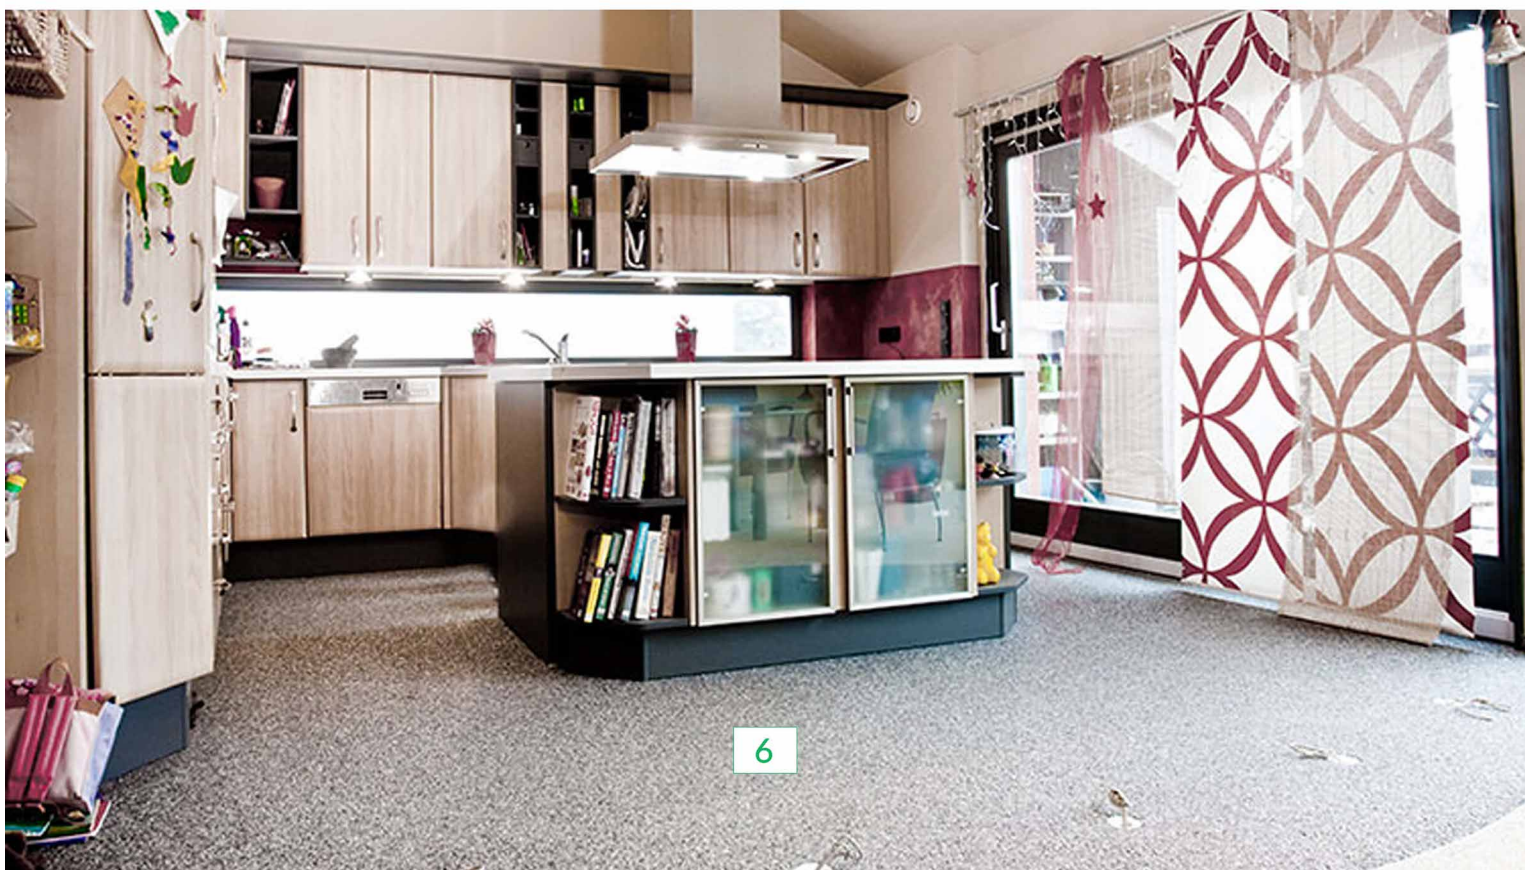

Always out of the ordinary – nothing commonplace or run of the mill – has been our philosophy ever since the firm was founded. This also reflects our enthusiasm and passion for anything in the construction industry.

Our products are more than just functional, they must appeal to the senses and emotions too. Just like a meal which can do more than merely satisfy hunger: it can explode into a fantastic taste experience. and that is what makes an enormous difference.

With impressive ideas, competence and determined enthusiasm, we create a visually attractive product which satisfies the need for optimal function. Since as the popular saying has it: "Appetite grows with eating" and continue to strive to beat our customer's expectations.

Outstanding, lasting results are the outcome of the synergy between research and construction.

Highest quality from SEEDECO® – floors made of marble granules and stone carpets.

SEEDECO® Home Flooring

SEEDECO® Home Flooring

SEEDECO® Home Flooring from Natural Recycled Glass and Natural Stone derives unique decorative character from individual sized glass and natural stone gravel. The glasses are mainly made out of recycled glass products and the stones are dredged from river beds throughout Europe.

These glasses and stones are screened multiple times for size, quality and shape creating a mix and surface texture that provides a perfect balance for application, aesthetics and maintenance. Customers can mix any color combinations or translate elegant designs from drawings into a finished product.

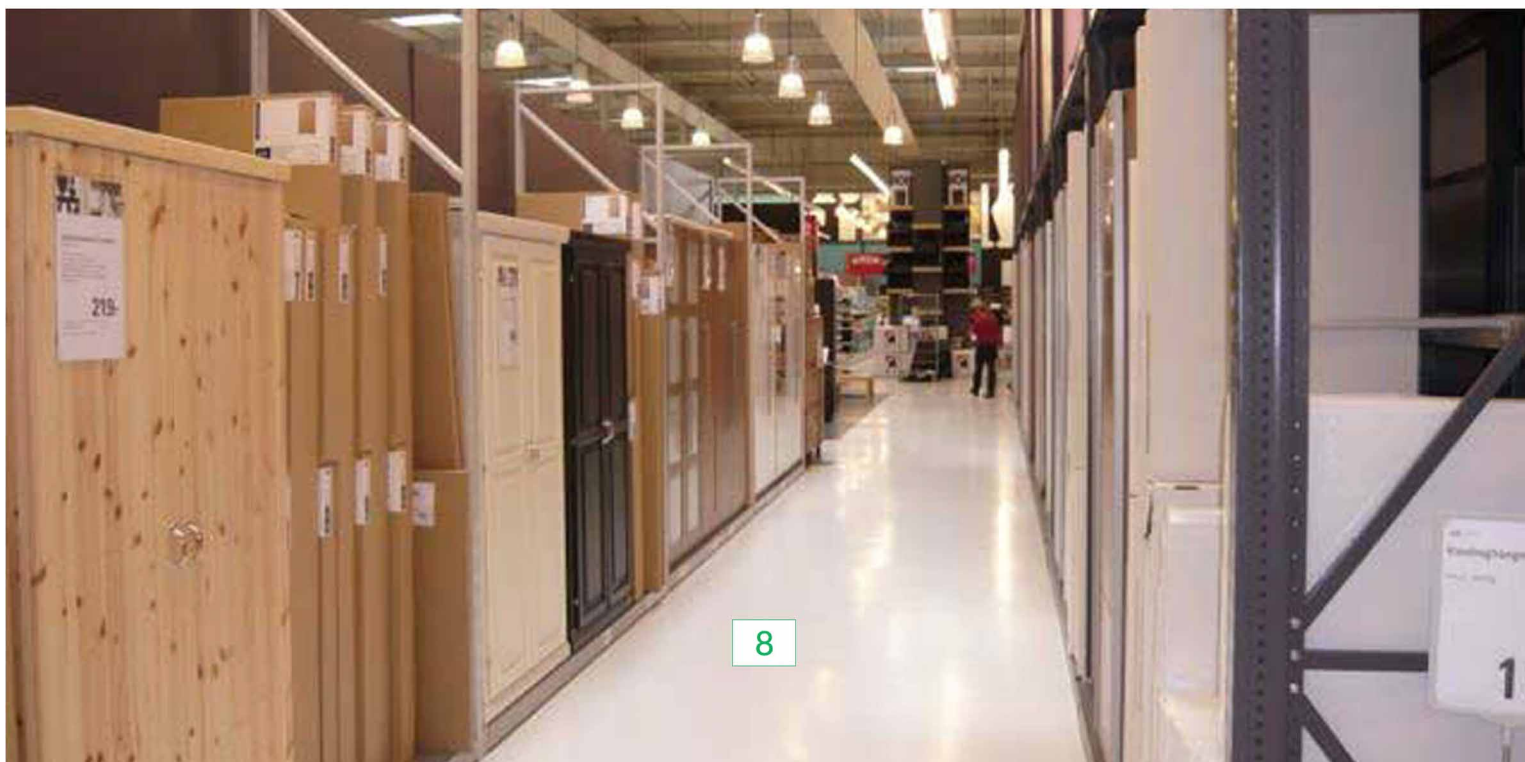

These single glasses and / or stones are then mixed together with epoxy or polyurethane resin on site and are subsequently installed and processed by our skilled and professional installation people into a level and seamless floor.

SEEDECO® Glass and Stone Carpets appear as a modern version of terrazzo creating a floor that always feels warm and comfortable.

SEEDECO® Commercial Flooring

SEEDECO® Commercial Flooring

What appears under your feet is as important as the entire interior decoration, because the quality of your floor covering influences the experience of the interior as a whole. The unique composition in SEEDECO® Home Flooring from Natural Recycled Glass and / or Natural Stone results in a combination of distinct properties:

- i. Durability and slip resistance
- ii. Insulating
- iii. Noise reduction
- iv. Warm feeling

From the reception, to the office showroom and to the Management Board Room SEEDECO® Commercial Flooring is the ideal custom made floor covering.

SEEDECO® Industrial Flooring

SEEDECO® Industrial Flooring

SEEDECO® Industrial Flooring from Natural Recycled Glass and Natural Stone derives unique decorative character from individual sized glass and natural stone gravel.

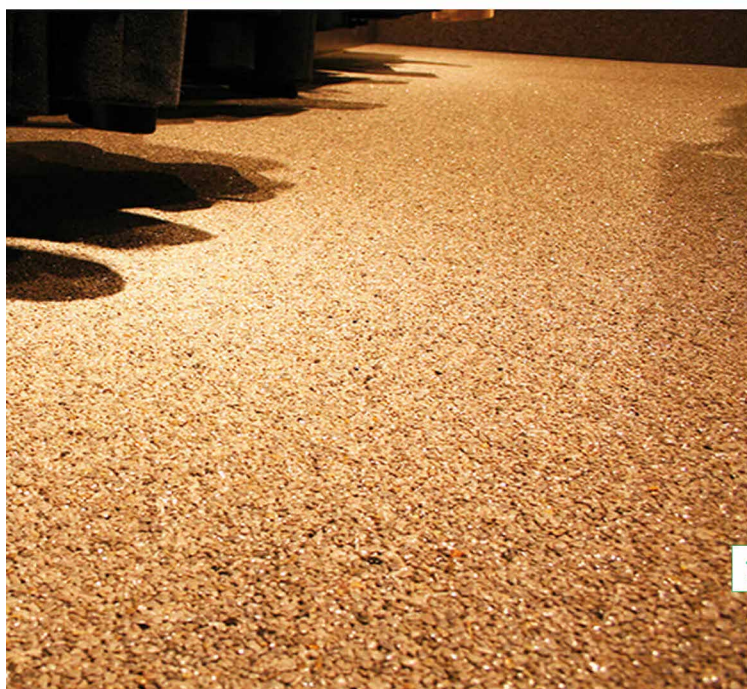

The recycled glass and stone are mainly made out of recycled glass products and the stones are dredged from river beds throughout Europe. The Glass and Stone selected are screened multiple times for size, quality and shape creating a mix and surface texture that provides a perfect balance for application, aesthetics and maintenance. Customers can mix any color combinations or translate elegant designs from drawings into a finished product. These single glasses and / or stones are then mixed together with epoxy or polyurethane resin on site and are subsequently installed and processed by our skilled and professional installation people into a level and seamless floor.

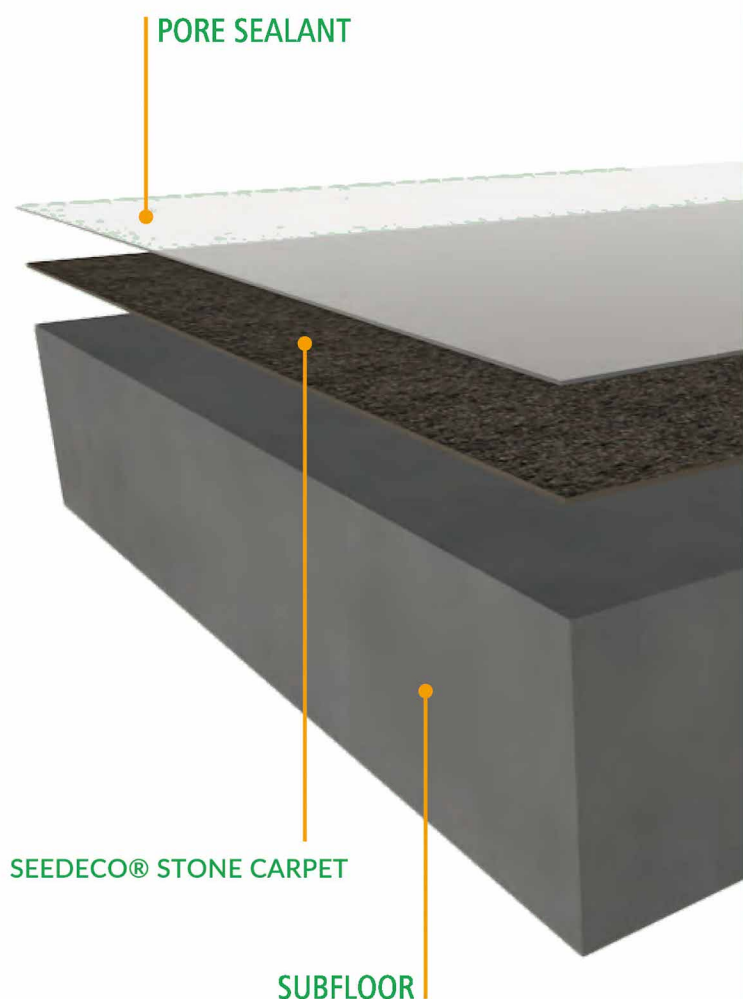

SEEDECO® Glass and Stone Carpets appear as a modern version of terrazzo creating a floor that always feels warm and comfortable.

- i. Fast cure, UV-resistant, colorfast and can be walked on shortly after the installation.
- ii. Industrial flooring repairs during opening hours.
- iii. Renovation of care institutions with patients in residence.

QUALITY

CE - MARKING

EXTREMELY RESILIENT

SKID RESISTANT
R9 / R10 (DEPENDING IN GRAIN)

SOUND ABSORBING
DIN EN ISO 354 AND
DIN EN ISO 11654

NON-FLAMABLE, WITH ONLY A
FEW COMBUSTIBLE PARTS
NACH DIN EN-13501-1: A2 FL-s1

SUITABLE FOR FLOOR HEATING

FROST RESISTANT

CHAIR CASTER SCRATCH RESISTANT

SUITABLE FOR WHEELCHAIRS

LOW MAINTENANCE

SUITABILITY AND USE

A FLOORING SYSTEM FOR INDOOR AND OUT DOOR

Suitability and Use

Indoor areas: In all living areas for example: offices, corridors, stairs, bathrooms, toilets, etc.

Outdoor areas: balconies, terraces, and pathways.

Quality

Quality control, quality inspection made by neutral, government-approved test institutes;
On-going self-monitoring.

End-product

Seamless homogenous coating, solvent-free, open-pore and skid resistant, wheelchair suitable execution possible, abrasion-proof, slip-proof and feet friendly.

Build

Monolayer construction,
open-pore or with pore sealant.

Specification

Application thickness: 4-6 mm
(Grain size: 1-2 resp. 2-3 mm)

Application thickness: 6-8 mm
(Grain size: 2-4 resp. 4-6 mm)

Weight

Own weight 12-16 kg/m²
(2,0 kg per mm layer thickness)

Features

Open-pore structure, colored or multicolored, the natural look or with colored stones- customized to hundreds of tones.

Scent

Once installed: odorless

During installation: solvent-free, minimal odor.

Grade

Pressure resistance: 30,5 N/mm³

Flexibility: 10,0 N/mm³

Tensile Strength: 3,0 N/mm²

Abrasion Depth: Vm = 171 mm³

Adhesive bonding(concrete): 1,88 N/mm²

Modulus of elasticity: 5.700 N/mm²

Slip resistance: R9/R10 (depending on grain)

Slip resistance in wet areas: A+B+C

Flammability : Non-flammable with
(DIN EN 13501-1: A2 FL-s1) few combustible components.

Water

Resistant to water and frost (de-icing salt shock-resistant), through the open structure rain-water runs off, without leaving puddles.

Interaction with Chemical Agents

Oil and gasoline do not stain, in addition, resistant to acids, bases and other chemicals.

Heat Exposure

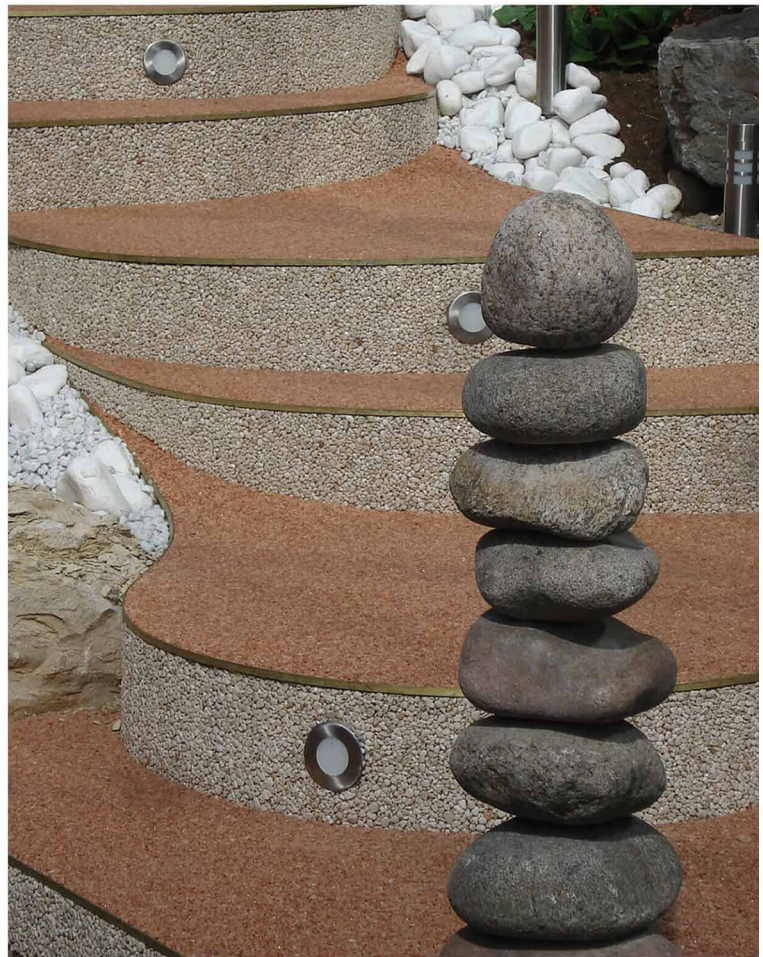

Temperature resistance from -40 C to + 80 C, and suitable for floor heating.

Electrical Conductivity

Resistance ohms 1,08 x 10¹² Ohm.

Does not arrive when walking.
