PRODUKTBESCHREIBUNG

GaLa DEKO STIXX ist aufgrund seiner mineralischen Ummantelung ein kreatives und langlebiges Gartendekorelement – einzigartig in seiner farblichen Vielfalt und seinem hochwertigem Aussehen.

Selbst nach Jahren ist der GaLa DEKO STIXX in Form und Farbe stabil, da er durch die Mineralisierung und Pigmentierung farbeständig und bis in die kleinsten Poren verfeinert ist. Selbst unter extremen Bedingungen, wie z.B. als Schüttung auf Perforalblechen oder Gerippten zeigt sich der GaLa DEKO STIXX robust und widerstandsfähig.
