

CEMWOOD

Mineral coated wood chips

PRODUCT DESCRIPTION

Consisting of mineral-coated wood chips, **GaLa DEKO STIXX** is a high-quality and natural soil additive for the colourful and long-term mulching of garden and landscape surfaces.

Controlled processing of the wood chips achieves a homogenous grain structure ensuring precise shaping in the garden design. In addition to the typical properties of renowned mulch products, GaLa DEKO STIXX also offers new design options through its portfolio of colours. Unlike ordinary products, the decorative chips stand out for especially high durability, weather resistance and resistance to fungi and rot.

GaLa DEKO STIXX

DECORATIVE MINERALISED WOOD CHIPS

- ▶ weather-resistant
- ▶ attractive colours
- ▶ resistant to fungi and rot

MINERALISED WOOD

natural like wood
resistant like stone

TECHNICAL DATA

Dated: June 2014

DATENBLATT

FIELDS OF APPLICATION

- ▶ garden beds
- ▶ parking facilities and paths
- ▶ enclosures for trees and shrubs
- ▶ plant pots
- ▶ indoor and outdoor decorations

PRODUCT BENEFITS

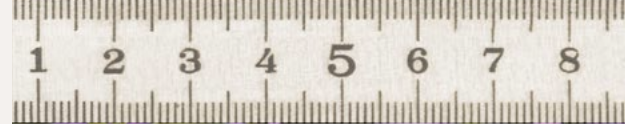

- ▶ weather-resistant over many years
- ▶ cost-saving (no additional mulching required)
- ▶ water-conserving (reduced evaporation)
- ▶ resistant to fungi and rot
- ▶ various colours and creative applications
- ▶ weed-repellent
- ▶ no soil erosion
- ▶ protects plant roots

TECHNICAL DATA

Average chip length	mm	60
Bulk density	kg/m ³	~ 260
Recommended fill height	cm	5 - 10
Packaging unit	Litres per bag Litres per Big Bag	50 2000
Units per palette	bags	39

COVERAGE

The content of one 50 litre bag covers 1 m². Depending on the planting situation and evenness of the ground, the chips in a Big Bag cover a bed area of about 40 m².

LEGAL NOTICE

We recommend adjusting the installation process to the relevant local conditions and installing a sample to confirm the suitability of our product if necessary.
